Arkansas Stone Fruit Nursery Stock is VIRUS-FREE

Our stone fruits are grown under the vigilant eyes of the inspectors of the Arkansas State Plant Board in a region free from virus diseases, making it by far the safest and best nursery stock for you to buy. Virus diseases such as "Peach Yellows," "Phony Disease," "Peach Mosaic," and "Little Peach Disease" have ruined thousands of valuable peach orchards and practically wiped out the peach industry in certain peach-growing areas. These diseases are established in orchards by means of a few diseased trees in shipments of nursery stock and when planted these diseases spread from tree to tree by insects. The only control meas-

ures so far available are the destruction of the trees and planting of new trees grown in regions free of these diseases. Don't take any chances by ordering trees that might be infested with these diseases. ALL OF OUR STONE FRUIT NURSERY STOCK IS COMPLETELY FREE FROM VIRUS DISEASES AND IS THEREFORE THE BEST AVAILABLE FOR PLANTING IN ANY OF THE FRUIT-GROWING AREAS IN THE UNITED STATES. BE SAFE AND ORDER FROM US. DON'T RISK THE LOSS OF YOUR ENTIRE ORCHARD.
